Summary

Passionate professional with 5 years of experience in crafting reliable code and improving the user experience for various multinational companies. Currently improving my skills in this new era of AI-powered development.

Education

ESTG - Polytechnic of Porto

Sep 2018 - Jul 2021

Bachelor's Degree, Computer Engineering

Skills

Frontend

TypeScript
JavaScript
React
HTML & CSS
Next.js
Tailwind CSS
GraphQL

Backend & Testing

Node.js
Jest
React Testing Library
Cypress
Playwright

Projects

Isalio

Built a desktop invoicing app for customers, invoices, payments, and sending emails, with data staying on the user's machine.

PsyWriter

Helped design and build the PsyWriter website, with attention to speed and a clearer layout.

Droid In The Jar

Created a clean, minimalist website for Droid in the Jar that showcases the brand's personality.

Experience

Net-a-Porter (External) | Frontend Developer

Jan 2025 - Present

Build and maintain features for the Net-a-Porter and Mr Porter stores, with a focus on improving product listing and product details experiences.

Instant Group (External) | Frontend Developer

Jul 2023 - May 2025

Helped build a greenfield office management and scheduling product from the start. Delivered back-office and user-facing interfaces, including search and office management workflows.

Trainline (External) | Software Developer

Jan 2022 - Jul 2023

Partnered with the SEO team to ship product improvements using Node.js, React, GraphQL, and Redis. Contributed to architectural enhancements that improved maintainability and performance.

Mindera | Software Developer

Jan 2022 - Present

Consulting for international clients such as Net-a-Porter, Instant Group, and Trainline. Focused on building and maintaining web applications, specially in frontend development.

Blip | Frontend Developer Intern

Mar 2021 - Jul 2021

Implemented a new product feature with React, TypeScript, RxJS, and SASS. Wrote unit and functional tests to protect quality and reduce regressions.
